View the platform from a student perspective. This is where learners access their Recommended Path and Assignments. The Recommended Path includes nuggets suggested by AI and set by teachers.

Shows a student view of the courses you have assigned to your classes. You can view course strands and micro-lessons called ‘nuggets’ here.

View real-time data on student performance, effort and levels of understanding.

Explore the entire content library to find thousands of learning resources to use in your lessons.

Set nuggets to your whole class. These will appear in their Recommended Paths.

A useful homework setting tool. You can assign an existing nugget to a class or individual students. You can also set tasks you have created yourself.

Select which courses your classes will study here. You can also manage your classes, set up new groups and reset student passwords in this area.
1. HOW TO ASSIGN COURSES

Select a pre-loaded class or set up a new class.

Choose courses to assign to the class.

Use this page to add additional teachers to the class and reset student passwords by clicking on a student.

2. HOW TO SET A NUGGET

Use My Planner to get your whole class to complete a nugget or a diagnostic.

Click ‘Add plan’ and select the date for the plan to start.

Preview and select nuggets to add to your plan.

Once you've made a plan for one class you can import this plan for another class.

Come back to My Planner to review completion.

3. HOW TO VIEW STUDENT DATA

Use the Teacher Dashboard to monitor student performance and identify class trends.

MARKBOOK TAB
See time spent and scores at a class or individual student level. You can filter results by date completed.

NUGGETS TAB
Question-level analysis of nuggets allows you to view individual answers and class trends.

INTERVENTIONS TAB
View learners’ performance and effort to identify students to support or praise.
