Long version (108 words)

CENTURY is the tried and tested intelligent intervention tool that combines artificial intelligence with the latest research in learning science and neuroscience. It creates constantly adapting personalised pathways for every student and powerful intervention data for teachers.

Our intelligent intervention tool works in three ways:

- The artificial intelligence engine creates **personalised learning pathways** that plug gaps in knowledge and remedy misconceptions.
- Easy-to-use data dashboards aid **teacher-led interventions**. Students who need additional support or challenge are quickly identified.
- Teachers are provided with **thousands of high-quality resources** for use in a variety of learning models including homework, classwork or revision.
