

Senior QA Engineer

Location: Hybrid (office and home working)

Contract: Permanent

Salary: £50k - £60k

Overview

We are seeking a Senior QA Engineer to join our engineering team and support the advancement of our existing automated testing. You'll work with a team of front-end and back-end engineers and play a key role in shaping the future of education.

At CENTURY, you will work closely with product managers and engineers, seeing features from inception to production and ensuring automated coverage of features is maintained. You will be responsible for ensuring the quality and reliability of our products through automated testing, performance testing, and quality assurance best practices.

About CENTURY

Founded by entrepreneur Priya Lakhani OBE in 2013, CENTURY is a team of 100 people dedicated to improving education through technology. Backed by long-term investors, our innovative AI-driven tools personalise learning and provide rich data insights to empower teachers and organisations. We partner with leading schools, universities, and companies globally.

Who You Are

We are looking for a Senior QA Engineer who:

- **Thrives in Independence:** Works autonomously while driving innovative solutions.
- **Brings Fresh Perspectives:** Challenges conventional thinking with new ideas and builds consensus around them.
- **Possesses Diverse Experience:** Brings a wide range of design expertise to enrich our processes.
- **Is Adaptable:** Open to various technologies and methodologies, committed to continuous improvement.

- **Collaborates Effectively:** Balances independent work with teamwork in a collaborative culture.
-

The Role

- Work alongside a team of product managers and engineers to Design, develop, and maintain end-to-end automated test suites using Playwright, focusing on critical user journeys and ensuring seamless functionality across different browsers and devices.
 - Set up and manage automated testing pipelines in GitLab CI/CD, including test execution, reporting, and integration with our development workflow.
 - Collaborate with developers, product managers, and UX designers to understand requirements and create comprehensive test strategies that align with educational user needs.
 - Develop and maintain testing documentation, including test plans, cases, and technical documentation.
 - Identify, investigate, and document software defects, working closely with the development team to ensure timely resolution.
 - Champion quality best practices and contribute to continuously improving QA processes and testing frameworks.
-

About You

- Champion quality best practices and contribute to continuously improving QA processes and testing frameworks.
 - Good communication skills, ability to manage stakeholders with status updates, and high bar for processes and documentation.
 - Proven experience with GitLab CI/CD and version control systems.
 - Strong programming skills in JavaScript/TypeScript.
 - Strong understanding of software testing methodologies and best practices.
 - Experience with API testing and performance monitoring tools.
 - Knowledge of accessibility testing and WCAG guidelines.
 - Your passion is engineering, and you pride yourself in your work.
-

How to Apply

Send your CV and covering letter to careers@century.tech with the subject line 'Senior Product Designer.'

What We're Offering

- Competitive salary of £50k - £60k.
 - 25 days holiday (+5 rollover days) + bank holidays.
 - Additional leave: your birthday off and three extra days between Christmas and New Year.
 - Hybrid working with access to a Central London office.
 - Option to work overseas for up to 3 weeks annually (must follow UK working hours).
 - Regular company social events (in-person and online).
-
