

KS2 Assembly

CENTURY is an online learning platform that gives you a personalised learning path that constantly adapts. It also shows your teachers how you're getting on, so they can help you with different topics during the year. The platform is used by many schools for homework and in class to help improve student learning.

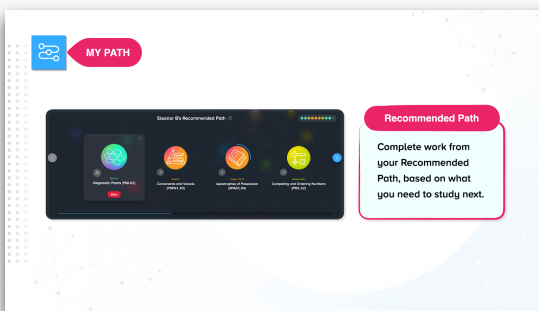

Our plan is that CENTURY will be used *[in school/ for homework/ other]*.

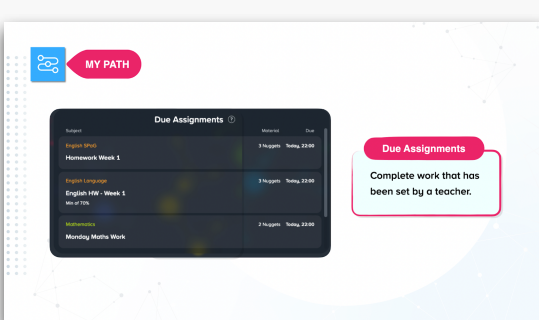

Each CENTURY course is completely aligned to what you need to learn. The content is made by teachers and split into bite-size pieces of learning material called Nuggets.

We're going to play a video to introduce you to CENTURY:
<https://www.youtube.com/watch?v=7J42A175qDU>

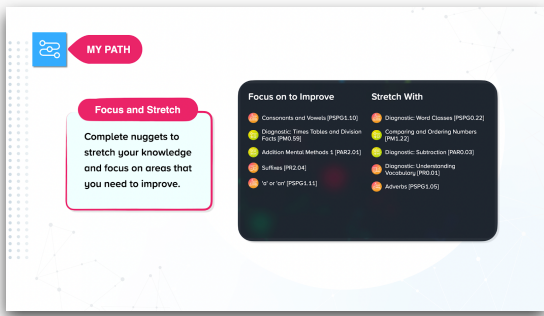

As you have seen, there are a number of ways to use CENTURY.

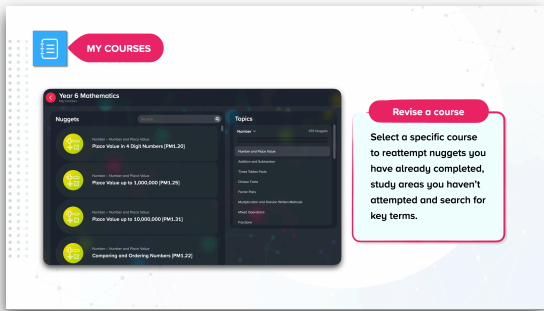

Firstly, you can follow your Recommended Path and complete work based on what you need to study next.

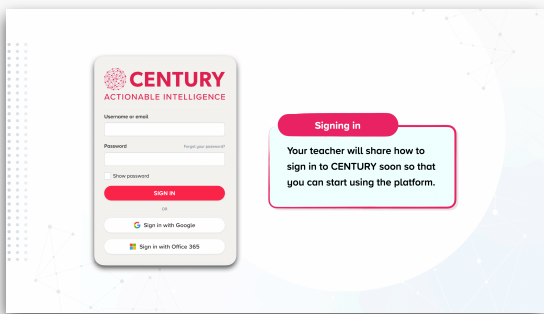

You can complete work set specifically by your teachers under Due Assignments.

You can work on your strengths and areas to improve on in the Focus and Stretch section.

Or, you can use the My Courses tab to focus on a specific course. Here, you can see an entire course. This means you can reattempt nuggets you have already completed, study areas you haven't attempted yet and search for key terms.

Your teacher will share how to sign in to CENTURY soon so that you can start using the platform.
