How does AI work?

Artificial Intelligence (AI) recommends content based on what you have done before (e.g. streaming services learn what you like and recommend TV shows/movies for you to watch).

CENTURY does the same, except it finds out what you need to learn and recommends learning to you.

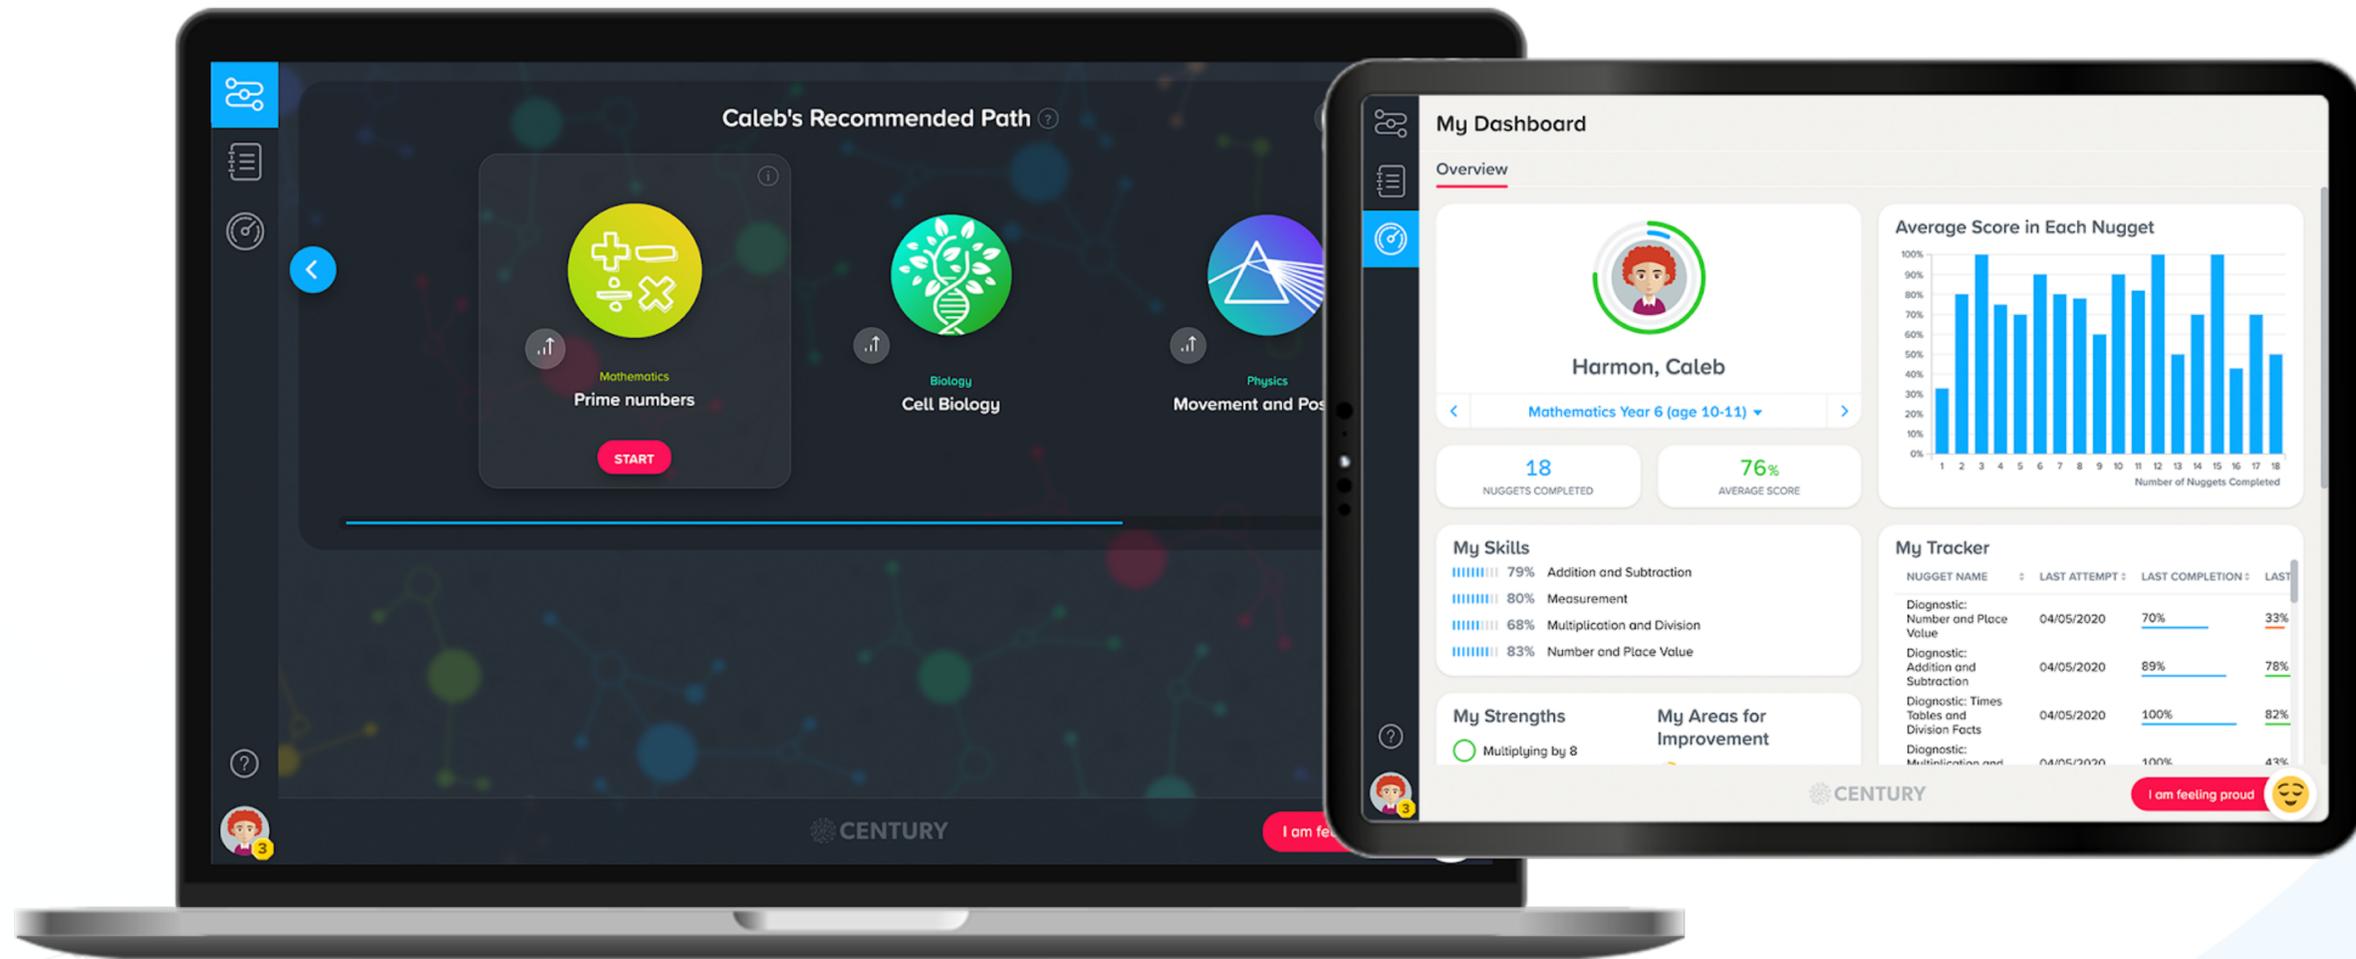

## What is CENTURY?

CENTURY is a tool to help you improve your skills in different subjects.

You can use CENTURY on a computer, laptop, tablet or smartphone.
