challenge

Teacher Guidance

for teachers in schools

To boost your organisation's chances of winning a prize in the **Spring Challenge 2026**, here's some guidance for encouraging learners to study on **CENTURY**:

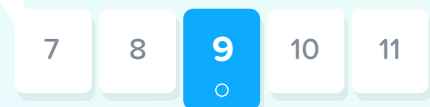

1. Schedule time

Think about when learners can access CENTURY. This could be during registration, scheduled class time, independent study sessions or CENTURY after school clubs.

2. Using the Planner

Mapping diagnostics to your scheme of work allows you to choose when students will encounter different content. Use the Planner to set up a plan for each assigned course.

3. Set expectations

Set expectations for learners working on CENTURY, for example complete a nugget a day.
